

HW2:

Exercise 3:

Main Stack: Temporary Storage Queue:

3
2
1

Move elements to queue:

MS: TSQ:

1
2
3

Move back to stack:

MS: TSQ:

1
2
3

Exercise 4: (if length of string is odd it can't be valid)

1. Create an empty stack to hold starting brackets
2. loop through each character in the string. Add opening brackets to the stack we made.
3. If a character is not an opening bracket, pop the most

Recent bracket off the Stack & see if they match

If no Return False

If they all match & you go through the whole String return True
